

ARIZONA SPORTSMEN ASSOCIATION ELECTION

Altken Led Again in the Second Day's Contest.

A business meeting of the Arizona Sportsmen's association was held yesterday for the purpose of electing officers to serve the ensuing year and to name the place for the next meeting. Tucson was the city chosen and Joe Ronstadt of Tucson was elected president of the association and Mr. Stewart secretary. It was also decided hereafter to shoot the events on the program off in the morning or if that be impossible then at the beginning of the following day but in any event to close the tournament each day at noon. The members of the association will in this way be given a chance to visit the races.

On the program of yesterday but 105 targets were shot out of the 145 called for on the schedule events, thirteen and

fourteen not being reached but will be shot off the first thing this morning. In the shooting Altken of the Phoenix team easily led and from appearances will capture the best average prize. He also made an unusual record in long runs. At the close of the program Thursday he had forty-five straight targets to his credit and at the beginning of yesterday's events he made an additional forty-nine giving him a record of ninety-four.

In event nine, fifteen targets, four tied for first place with a score of fifteen: Altken, Morrell, George Julian and Reno, W. H. The second money men made a score of fourteen, Tanner, Chas. Julian, Edens, Douglas, Bulwer and Jones.

Event ten was the "Hotel Adams" event for twenty-five straight targets. Altken won with a score of twenty-five and Morrell and Bulwer tied for second prize with a score each of twenty-four.

The eleventh event for the individual championship medal was one of the features of the day. Tanner and Hart tied each with a score of forty-seven out of a possible fifty and when shooting off the tie Tanner won by one target. Altken, with a score of forty-six, took first money. Morrell, score forty-five, second, and W. H. Reno, score forty-four, third.

Event twelve for fifteen targets was won by four each with a score of fourteen, Tanner, Morrell, Bulwer and Duff. Six tied for second money each with a score of thirteen: Altken, Webber, Hart, Geo. Julian, W. H. Reno and Twitchell.

Of the 105 targets shot yesterday but fifty-five counted on general average as event eleven, of fifty targets was a medal event. The result on high general average yesterday was: Altken, fifty-three out of the possible fifty-five; Morrell, fifty-three; Hollings fifty-two; Geo. Julian, Seaver and Tanner, fifty-one. Of these all are amateurs with the exception of Hollings and Seaver.

Out of the total targets of the day shot at Altken got ninety-nine, four tied for second place with a score of ninety-eight, Tanner, Morrell, Reed and Hollings and Seaver took third money with a score of ninety-six. Of these Reed, Hollings, and Seaver are professionals.

The shooting today besides the unfinished events of yesterday will include The Wellington event and the event for the association diamond medal the last named to be contested for by teams of four members each. The first event will take place at 8 o'clock.

GOOD NAME WANTED FOR A NEW TOWN

Ample Inducements are Extended to
Those Who Can Think.

Another naming contest is on. This time it is not for a railroad train it is waster, but a name for a town. Several prizes are offered contestants. The person who sends in the name which will be selected will receive a ticket from Phoenix or Prescott to Los Angeles and return, good for

ninety days. There will be eleven other persons who will receive prizes for names which will deserve honorable mention. The first will be worth \$5 to the sender and each of the others will be worth \$1.

The location of the town is kept a secret as well as the names of the promoters of the enterprise, in order that contestants may not be biased. It may be said, though, that there is already quite a settlement there, the habitations being mostly tents. About 200 men are employed and there is now on the way a consignment of fifty carloads of freight. The town is already of so much importance that it deserves a name at once. It ought to have been named months ago, for within a very short time \$150,000 has been expended there.

The contest will begin January 1 and will close on February 1. The winner of the ticket can get it any time after February 5, and the other winners will get their prizes at the same time.

The man at the head of this movement, though his name can not now be mentioned, is known to The Republican to be one of the most responsible in the territory. All names should be sent to Box 196, Prescott.

BLEACHING BONES ON EASTERN DESERT

The Companion of a Ghastly Find of
a Week Ago.

Dudley S. Lewis, of Mesa, was in town yesterday and reported that the rest of the skeleton, the skull and one of the feet of which was found a week ago near the twenty-seven mile post east of Mesa, had been found. Acting Coroner Burnett directed him to bring the bones to the city, when the inquest which was begun with the finding of the skull will be continued. There is little hope yet of discovering the identity of the man whose widely separated bones have been bleaching on the desert for months.

The first find included the shoes and hat. They were of a good quality and indicated that the man had been in the practice of dressing well. This indication has been strengthened by the finding of the underclothing, which is of wool and silk.

There is a suspicious looking hole in the bone of the right hip and another in the bone of the left shoulder. It is thought that both were made by a bullet, but perhaps more can be determined about that after the bones have been brought in.

The theory that the man had been wounded by a gunshot and that he had traveled for some distance afterward fits in well with a circumstance suggested by the condition of the shoes. It seemed as if it had at one time been sodden with blood.

We now have just what you have been looking for, for a long time. Boiled cider for mince meat. Melzer Bros. Phone Main 75.

MURDER

Is the cry that goes up from our over-crowded Stock Rooms where the knife is relentlessly at work slashing prices.

15c to \$2.50.

SADDLES,
\$8.50 to \$65.00.

HARNESS,
\$7.50 to \$50.00.

Sugar Beet Implements

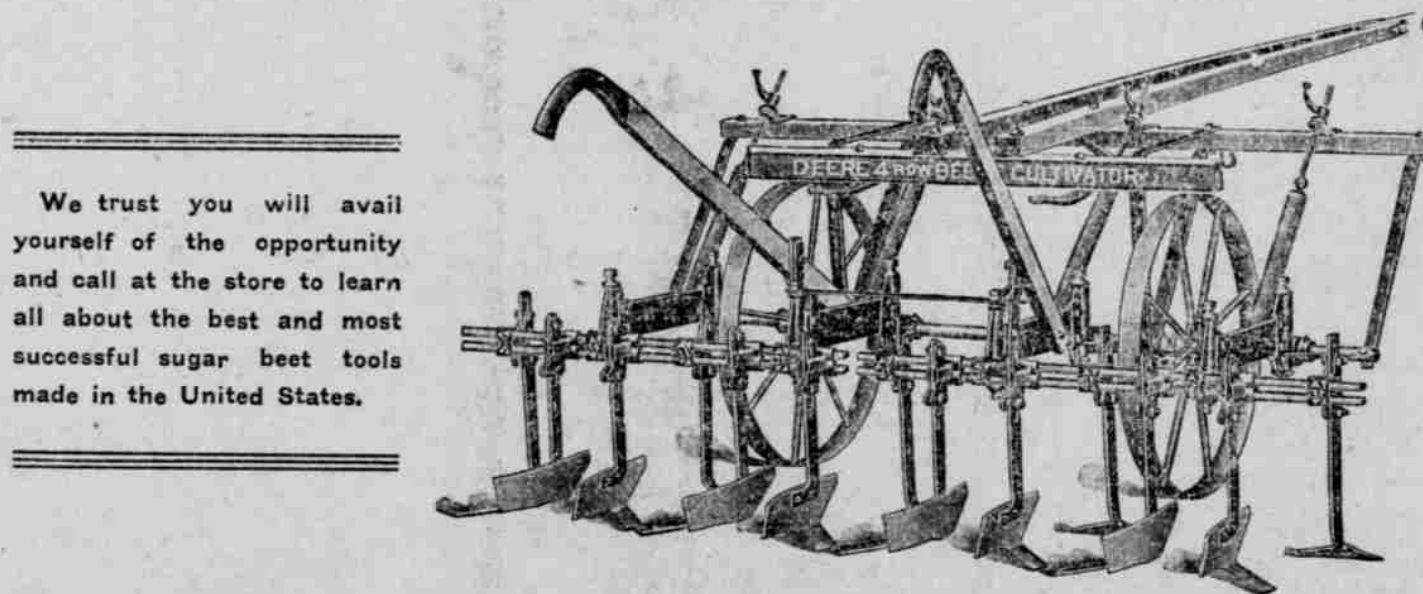

Now that the culture of sugar beets is to be one of the valley's achievements, the question of where to buy the tools naturally arises. We have the John Deere line of goods, and are prepared to give you prices on anything that you may need.

We show you here a cut of the Deere Beet Seeder. The advantages of this seeder are many. We would have to use much more space than this to even attempt to describe it. For instance, it has adjustable scrapers, which keep the wheels free from dirt, and thus insure a perfect covering of the seed. Then the fluted feed roll is used on the Deere implements, the amount of seed being adjustable from 15 to 30 pounds to the acre.

The adjustment is made by means of a lever moving over a graduated index, and is within easy reach of the driver. The rolls run slowly and have large flutes or grooves, avoiding all crushing or grinding of the seed. And the Deere does not depend on the wheels for the power to operate the feed, but drive the feed rolls direct from the main shaft, by means of a sprocket chain. These are only a few of the fine points of these goods. Call and investigate them, we are glad to answer questions.

This is the Deere Beet Cultivator. These machines were the first successful sugar beet cultivators made in this country. And from the start they have been the best. Close attention has been given to every requirement and thus in the Deere we have absolutely the best sugar beet cultivator made today. To try to explain the machine to you through an advertisement would be almost impossible. You have to be here with our implement man with a machine in front of you. Then he can explain every movement of the machinery and give you an intelligent description of the working parts.

We trust you will avail yourself of the opportunity and call at the store to learn all about the best and most successful sugar beet tools made in the United States.

Paints, Oils, Etc.

We want to again call your attention to our line of paints and oils which we believe is as complete as any to be found in this city.

We would make special mention of the celebrated Berry Bros. line of varnishes. You all know what they are; now we want you to know that we have them in stock. The Japan Drier, Asphaltum, Liquid Granite, Coach Varnish, Furniture Varnish, Carriage Varnish, Hard Oil Finish, etc., are all here and we would be pleased to furnish prices.

Have you ever tried any of the famous "Sapolin" goods? If not, we want you to use it next time; a trial is all we ask, for we believe that once used, always used. First in the Varnish-Stain. This article stains and varnishes all at the same application. Then there are the enamels. The aluminum and bath tub and stove pipe enamels are the most pleasing as well as economical enamel on the market.

And in this connection, we would also say that we have the Star Enamels. They come in all colors. They are manufactured by the same people as the Sapolin goods. Call for them and get the best. If you ever have occasion to use a carriage paint, call for the "Sapolin." We know that there are many so-called carriage paints on the market, but we know that you cannot find one that will give you more satisfaction nor that will dry with a prettier gloss. They are par excellence.

If you mix your paints, don't forget that we have dry paints in stock, as well as turpentine, boiled and raw linseed oil, paint oil, etc.

Ask about the famous "Arco Elastic Carbon Paint." The best roofing paint made. Will last for five years. Fully guaranteed. If your roof leaks, let us figure with you on this point.
